Skills this role needs

Teaching	Counselling	Recruitment	Partnerships and Outreach	Communication

Job description

iTeach Schools

iTeach Schools runs high-quality schools in partnership with the government, so that every child in India has the chance to dream big and achieve boldly. Its schools serve students from communities that are often left out of good education. iTeach works with students, schools and families to make education fair for every child. Many of its full-time team members began their journeys as interns. This role sits within iTeach Schools' internship program, which places interns in teaching and org-building teams across its school network.

Role

The iTeach Internship Program is a 1 to 3 month hands-on learning experience for young people who want to work in education. Interns are treated as part of the team from day one. They take on real work in teaching or in roles that help run the schools, such as counselling, recruitment, and partnerships and communications. Along the way, each intern gets a mentor, regular feedback and time to reflect on what they want to explore next.

Responsibilities

- Take on real work in a teaching role or a non-teaching role such as counselling, recruitment, or partnerships and communications.
- Support students, schools and communities through work that has a direct impact.
- Learn what it takes to run high-quality schools in partnership with the government.
- Meet your mentor regularly for guidance, feedback and reflection.
- Join Leadership Forum sessions with iTeach leaders and education sector experts.
- Attend workshops and learning sessions held for iTeach staff.
- Visit other schools in the iTeach network to see different practices at work.
- Reflect on your experience and use feedback to build your skills and confidence.

Requirements

- Be a student or an early-career professional.
- Able to commit about 25 hours a week for a minimum of one month. Internships run for 1 to 3 months.
- Be based in or able to work from Pune.
- Interested in hands-on work in a school setting, whether in teaching or in a non-teaching role like counselling, recruitment or communications
- Willing to work as part of a team and take feedback to grow professionally

Benefits

- Paid stipend of ₹7,500 to ₹12,000, depending on role and duration
- Dedicated mentor for guidance and feedback through the internship
- Access to a leadership forum with sector leaders and experts
- Regular staff workshops open to interns
- Cross-school visits to see different practices across the iTeach network
- Hands-on experience and professional skill-building in a real school environment

About iTeach Schools

iTeach Schools runs a network of free secondary schools for students from low-income communities in Pune and Mumbai. Working in public-private partnership with municipal corporations, iTeach designs and operates schools where the government provides infrastructure and funding partners contribute grants. The organisation has been running for over 10 years and has impacted over 9,000 young people across 13 schools. Headquarters: Pune, Maharashtra

Sectors: Education, School Management, Youth Development

The Problem They Are Solving Secondary education remains a significant gap for low-income students in Indian cities. In Pune, none of the city's 54 English medium public schools go beyond Grade 7, which means most students from low-income backgrounds drop out after that. Nationally, only 28.4% of students enroll in college after finishing school, and learning levels in government schools remain low.

Actvities

- Schools in Pune

iTeach runs 9 free English medium secondary schools (Grades 8 to 10) across Pune in partnership with the Pune Municipal Corporation. The schools are spread across neighbourhoods including Aundh, Kondhwa, Erandwane, Yerawada, Ganj Peth, Dapodi, Mundhwa, Hadapsar, and Karve Nagar.

- Schools in Mumbai

iTeach runs 4 free schools in Mumbai in partnership with Navi Mumbai and Panvel Municipal Corporations. The schools cover a wider range of grades, from Grade 1 through Grade 10, depending on the school.

- College to Career Programme

After students complete school, iTeach continues to support them for five years through its College to Career programme. This includes help with college admissions, course and scholarship guidance, near-peer mentorship through an alumni fellowship, career counselling, part-time and full-time job support, and one-on-one support for the most vulnerable students.

Impact

Since 2017, nearly 100% of iTeach students have passed the SSC Grade 10 board exam. 97% of alumni are enrolled in higher education, compared to the national average of 28%. Among alumni who have completed college, nearly 85% are working or pursuing postgraduate study.

For the 2025-26 SSC exam, 743 students appeared across 10 schools, with 99% passing and 72% scoring First Class or Distinction. iTeach Schools is a good fit for people with backgrounds in teaching, school operations, student support, counselling, or programme management who want to work directly with students and communities in urban Maharashtra.
