Skills this role needs

Artificial intelligence and machine learning	Training of trainers	Classroom assessment and grading	Microsoft Office	Hindi and English communication

Job description

Anudip Foundation

Anudip Foundation is a nonprofit that helps young people from low-income families build digital skills and find steady work. It brings practical technology training to communities that are often left out, working with schools, colleges and local partners to reach learners where they are. Alongside teaching, it counsels learners and supports them through every stage of their course so they can move into good jobs. Its work now includes training in artificial intelligence, so that young people from all backgrounds can keep pace with new technology.

Role

As Master Trainer for AI, you will prepare staff at partner colleges and schools in Prayagraj and Gorakhpur to teach artificial intelligence to their own students. You will also reach out to young people from underprivileged backgrounds, guide them through their AI course, and track their progress closely so that every learner finishes with skills they can use.

Responsibilities

- Lead train-the-trainer sessions that prepare college and school staff to teach AI with confidence.
- Map local areas to find young people from underprivileged backgrounds and counsel them to join suitable courses.
- Prepare learners for AI training and help them through academic problems with steady guidance and encouragement.
- Set and grade classwork, homework, tests and assignments.
- Monitor each learner's progress and step in early when someone needs extra support.
- Keep accurate and complete records of how college and school staff are progressing.
- Take on other tasks as the organisation's needs change.

Requirements

- A graduate degree in any field.
- At least 3-4 years of relevant experience, preferably in the IT or ITES industry.
- Professional training in artificial intelligence and its core concepts.
- Sound knowledge of AI fundamentals, machine learning, deep learning, natural language processing and large language models, computer vision, model deployment, AI tools and frameworks, and AI ethics and governance.
- Good computer skills, including sound working knowledge of Microsoft Office.
- Proficiency in English and Hindi, with strong communication and influencing skills.
- Willingness to travel for work and to be based in Prayagraj or Gorakhpur.

Benefits

- Competitive pay for a full-time position.
- A chance to grow as an AI educator while shaping how schools and colleges in your region teach new technology.
- Meaningful work that opens the door to better jobs for young people from underprivileged backgrounds.

About Anudip Foundation

One skill can transform a life at Anudip, over 730,000 lives have been empowered, with a commitment to reaching millions more. Since 2007, Anudip Foundation has been equipping youth and women in crisis with in-demand skills in coding, AI, and professional development, helping them break free from poverty.

Youtibe Videos

With "Life. Transformed." as its guiding principle, Anudip bridges the gap between the underprivileged and livelihood opportunities not just as a training center, but as a catalyst for economic growth connecting skilled individuals with employers.

> *Headquarters: Kolkata, West Bengal.*

Major Areas of Work

- DeepTech: Enhancing tech skills in line with the latest digital transformation needs of organisations.
- Diya: A technology-driven skills program empowering at-risk youth with digital-age learning and career opportunities.
- FuturePRO: Preparing the global workforce for tech-driven careers with 21st-century skills through discovery learning and ICT literacy.
- Anudip Academy: High-quality training programs preparing young job seekers for market-oriented roles, particularly in entry-level sales positions.
- AI Academy: Building future-ready skills with a focus on Generative AI, led by in-house experts in training, curriculum, and AI innovation.

Major Initiatives & Programmes

- AI Training for Government Schools: Launched an AI training programme for government school students in Thoothukudi, empowering youth with future-ready digital skills.
- Reskilling for Tomorrow: AI & Workforce 2.0: An event spotlighting AI's transformative power in reshaping work and empowering marginalized youth, graced by the Minister of State for Education and DoNER, Government of India.
- CXXO No Ceiling Summit 2025: Anudip's CEO Monisha Banerjee led a masterclass on making workforces AI-ready, bringing together 40+ corporate and startup leaders.
- AI and the Future of Work Pre-Summit (India AI Impact Summit 2026): Hosted a convening on building an equitable, AI-ready India, bringing together industry leaders, government representatives, and social organizations.

Impact

Since 2007, Anudip Foundation has empowered over 730,000 youth, with 53% being women, equipping them with essential digital and soft skills. The organisation runs 90+ Skills and Career Development Centers across 22 Indian states and 3 countries, supported by a team of 900+ members and partnerships with 400+ corporates. Anudip achieves a 70% job placement rate and has contributed to a 300% increase in family income among its graduates. The organisation's tech-driven skilling model has been featured by NITI Aayog for training over 500,000 youth for India's digital workforce, and Anudip has been recognized as a Great Place to Work.

Leadership

CEO – Monisha Banerjee

Co-Founder & CEO of iMerit – Radha Basu
