Jhpiego

J1.jpg Jhpiego is an international nonprofit health organization and an affiliate of Johns Hopkins University, working to improve the health of women and families around the world. For over 50 years, it has focused on making quality healthcare more affordable and accessible, training health workers, and strengthening health systems. Jhpiego has worked in India since the 1980s in close partnership with national and state governments, helping design and scale practical health solutions across 11 areas, including maternal and newborn health, reproductive health, nutrition, immunization, primary health care, and digital health.

Role

This role leads Jhpiego's Family Health work in Uttar Pradesh, covering maternal health, child health, and family planning programmes that support the state government in strengthening health systems and improving access to care. You will provide technical guidance, manage a team, and build strong relationships with government departments and partner organisations. You will make sure programmes are implemented well, data is accurate, and donors and leadership receive timely updates. You will work closely with state and district teams, technical experts, and partners to help improve family health outcomes across Uttar Pradesh. This role suits someone with strong public health expertise who can also lead a team and manage government relationships.

Responsibilities

- Give technical guidance for maternal health, child health, and family planning programmes, and support government partners in improving quality of care under RMNCH, LaQshya, Manyata, and related initiatives
- Help introduce evidence based practices and communication strategies to improve service delivery, keeping activities aligned with state, national, and donor priorities
- Lead, mentor, and supervise a team of 5 to 6 staff, supporting their growth and performance

- Act as Jhpiego's main point of contact with government departments like NHM, the Directorate of - - Family Welfare, and SIFPSA, as well as professional bodies like FOGSI and other partners
- Represent Jhpiego at state and national meetings, technical groups, and policy forums
- Oversee trainings, workshops, supportive supervision visits, and review meetings, working with operations, finance, and procurement teams for smooth programme delivery
- Monitor field activities and resolve implementation issues quickly
- Make sure programme data is collected, analysed, and reported on time, working closely with the M&E team
- Prepare donor reports, presentations, case studies, and documentation of best practices
- Track progress against programme goals and timelines, staying accountable to government and donor partners
- Support organisational strategy, new proposals, and compliance with Jhpiego and donor policies
- Take on other responsibilities as assigned

Requirements

- MBBS, MD, or MSc Nursing with MPH
- More than 8 years of experience in RMNCH (reproductive, maternal, newborn and child health) programmes
- At least 2 to 3 years in a state level role with supervisory responsibility
- Strong knowledge of maternal health, child health, family planning, quality of care, and health systems strengthening
- Experience designing, implementing, monitoring, and scaling public health programmes
- Ability to align programme priorities with government and donor strategies and deliver results
- Strong problem solving skills to handle complex implementation challenges
- Proven ability to build trusted relationships with government departments, medical colleges, professional bodies, and development partners
- Confident representing the organisation at high level meetings and policy forums

Benefits

- Be part of a globally respected health organisation with over 50 years of experience and strong ties to Johns Hopkins University
- Lead state level health programmes with direct impact on women, children, and families
- High level engagement with government departments, professional bodies, and development partners
- Opportunities to contribute to organisational strategy and new programme development

About the Company

[Visit website →](#)

Jhpiego is a global health nonprofit and an affiliate of Johns Hopkins University, founded in 1973 to improve access to quality healthcare in low- and middle-income countries. Originally established as the Johns Hopkins Program for International Education in Gynecology and Obstetrics, the organisation has evolved into a global leader in strengthening health systems, training healthcare professionals, and expanding equitable access to lifesaving care.

Youtube Video

Today, Jhpiego works in more than 30 countries in partnership with governments, healthcare institutions, donors, and local communities to improve health outcomes for women, children, and underserved populations.

J1.jpg

Major Areas of Work

- Maternal, Newborn & Child Health: Improving the quality of pregnancy, childbirth, newborn, and postnatal care through evidence-based interventions.
- Primary Health Care: Strengthening health systems to deliver integrated, equitable, and people-centred healthcare services.
- Infectious Diseases: Supporting prevention, diagnosis, and treatment of HIV, tuberculosis, malaria, COVID-19, and other infectious diseases.
- Health Workforce Development: Building the skills of doctors, nurses, midwives, and frontline health workers through competency-based training and digital learning.
- Women's Health & Gender Equity: Advancing family planning, reproductive health, cervical and breast cancer prevention, adolescent health, and gender-responsive healthcare.
- Digital Health & Innovation: Leveraging digital technologies, AI, data systems, and innovative service delivery models to improve healthcare access and quality. :contentReference[oaicite:1]{index=1}

Major Initiatives & Programmes

- Maternal and Newborn Health Programmes: Improving safe pregnancy, childbirth, and newborn survival through provider training and quality improvement.
- Helping Mothers Survive (HMS): A globally recognised simulation-based training programme that strengthens the lifesaving skills of healthcare providers managing maternal emergencies.
- Health Workforce Strengthening: Supporting nursing, midwifery, medical education, and competency-based professional development.
- Family Planning & Reproductive Health: Expanding access to contraception, reproductive healthcare, and adolescent-friendly services.
- Digital Health & AI Solutions: Developing digital health platforms, telehealth systems, AI-enabled decision support, and data-driven public health innovations.
- Global Health Security: Strengthening disease surveillance, immunisation systems, infection prevention, emergency preparedness, and outbreak response. :contentReference[oaicite:2]{index=2}

Impact

- Over 50 years of experience improving global health systems.
- Works across 30+ countries in partnership with governments and local communities.
- Between 2019–2024, supported:
 - 20.1 million+ births in Jhpiego-supported facilities.
 - 81.8 million+ antimalarial treatments.
 - 10.8 million+ COVID-19 vaccinations.
 - 6.5 million+ HIV testing services.
- In India, Jhpiego has reached 998 million people through projects across 28 states, 2 Union Territories, and 700+ districts, while strengthening thousands of health facilities and training more than 821,000 healthcare providers.

Jhpiego offers professionals the opportunity to work at the intersection of public health, research, digital innovation, and health systems strengthening. Employees collaborate with governments, multilateral agencies, academic institutions, and frontline healthcare workers to design and implement evidence-based programmes that improve healthcare access and quality at scale.

Jhpiego is an excellent fit for professionals passionate about global health, maternal and child health, public health systems, health workforce development, digital health, infectious disease control, and creating sustainable healthcare solutions for underserved communities.
