Skills this role needs

Field team supervision and mentoring	Community outreach	Stock and register management	Coordination with government health services	Knowledge of government health schemes

Job description

YRG MERF

YR Gaitonde Medical Educational & Research Foundation (YRG MERF) is a non-governmental organisation that has worked in India since 1993. It helps communities get fair and lasting health outcomes through joined-up healthcare, partnerships and research. Its work covers prevention, care, support and treatment, especially for people affected by HIV (human immunodeficiency virus) and other infectious diseases. The organisation is guided by honesty and long-term thinking, and responds to both current and emerging health needs in communities.

Role

As Zonal Supervisor in Warangal, you will guide and support a team of cluster link workers who reach people at risk of HIV in villages and towns. You will make sure prevention supplies reach the people who need them, keep records accurate, and build strong links with local health workers, government departments and other NGOs. A big part of the job is helping eligible people sign up for government schemes so they can get the benefits and care they are entitled to.

Responsibilities

- Supervise the work of cluster link workers and mentor them in the field.
- Help with site mapping and take part in taluka and panchayat level meetings to explain the work done under the link worker scheme.
- Ensure a regular supply of condoms, and of needles and syringes where needed, and help set up condom depots and information centres and oversee how they run.
- Coordinate with other field staff, including TI (targeted intervention) teams, ANMs (Auxiliary Nurse Midwives), ASHAs (Accredited Social Health Activists), Anganwadi workers and staff of other NGOs working with the same communities.
- Build good working relationships with local government health facilities.
- Check referral slips at least once a month, update the area referral register and tell cluster link workers about any gaps.
- Maintain the stock and issue register by matching it against the sub stock register.
- Work with government departments at panchayat and taluka level so that eligible people are enrolled in schemes and receive their benefits.

Requirements

- A graduate degree in any social science subject.
- Freshers and candidates with up to one year of experience can apply, and 1-3 years of experience in district-level programmes in health, livelihoods, rural development, microfinance or HIV/AIDS (acquired immune deficiency syndrome) is preferred.
- Familiarity with government health policies and programmes.
- Strong communication skills.
- Ability to work in small teams and adjust to flexible ways of working.
- Based in or willing to move to Warangal, with regular travel to villages and to taluka and panchayat offices.

Benefits

- 24 days of annual leave, in addition to public holidays.
- Health insurance coverage.
- A collaborative and inclusive workplace that values people of different abilities, sexual orientations, ethnicities, faiths and genders.

- Chances to learn and grow professionally.

About YRG MERF

YRG MERF is built upon a foundation of innovation, integrity, and impact. Since our inception, we have been committed to driving positive change and delivering exceptional value to our beneficiaries and communities. Our journey is marked by a relentless pursuit of excellence, fostering a culture of collaboration and continuous improvement. We take pride in our rich history of achievements and the lasting relationships we have cultivated over the years. As we look to the future, we remain dedicated to upholding our core values and advancing our mission to create a sustainable and prosperous world for generations to come.

Youtube Video >

YRG MERF (YRG Medical, Educational, Research Foundation) was founded in Chennai with a singular, audacious purpose - to deliver ethical, compassionate, and stigma-free HIV care and research at a time when fear outweighed facts and people living with HIV were routinely turned away from hospitals, families, and society. From the beginning, YRG MERF was envisioned not merely as a clinic, but as a movement. A place where cutting-edge science would walk hand in hand with deep humanity. Where marginalised communities would not be studied from a distance, but served, protected, and centred. Where trust would be built patiently, one person at a time.

Now, 500+ global publications | 400,000+ lives reached | Work spanning HIV, TB, Hepatitis, NCDs, and India's most marginalized communities. Our journey until now has been full of learning and we hope to serve the communities better. From documenting India's first HIV case to reaching 634 districts. From one clinic to 600+ settings. From stigma to dignity.
